

Syllables 1

The answer to each Syllables clue is a word or words made up of some of the syllables listed above the clues. The number of syllables in each answer is in parentheses following the clue. The dashes indicate the number of letters in the answer. After you use a syllable, cross it off; each syllable will be used only once and every syllable will be used in one of the answers. When you are through, read down the first letters of the answer words and then the last letters and you will discover the name of a person followed by a quotation by that person.
