

Droplines 1

An interesting quotation has been fit into each of the diagrams below, though you'll have to rearrange the letters considerably to find it. Looking at each column of letters vertically, distribute the letters in it into the empty squares directly below. The black squares show you the spaces between the words in the quotation. They'll help you decide just which box to use for each letter over it in order to spell out the Droplines quotation. One letter has been dropped in place in the first quotation to start you off.
